PROFESSIONAL SUMMARY

Systems Engineering student at UTN FRBA with hands-on experience building AI chatbots, automations, and API integrations for real businesses. Interested in the intersection of finance, technology, and AI, with experience in fintech-related projects, commerce automation, and investment strategy backtesting. Focused on conversational AI, workflow automation, and data-driven systems.

EXPERIENCE

Participant & Developer — Transferime in UTNLABS (AI Chatbot)

Apr 2025 – Nov 2025

- Selected participant in UTNLABS, UTN's Entrepreneurship Center program, developing an AI chatbot for payment reminders and client tracking.
- Developed WhatsApp chatbot for payment reminders and client tracking.
- Built automations with **n8n** and integrated external APIs.
- Received media coverage on Telenoche at 9 pm, radio stations, and digital newspapers.
- Interview at Telefe: https://www.youtube.com/watch?v=w9o0AZCsxFc

AI Chatbot & Automation Developer— Freelance

Oct 2025 – Apr 2026

- Built and launched AI chatbots for iPhone stores and a travel agency, deployed on WhatsApp and Instagram.
- Automated sales, customer support, lead qualification, flight inquiries, quotes, and reservation workflows.
- Integrated Google Sheets, PostgreSQL, ManyChat, n8n, and external APIs for real-time business operations.
